Mobile: +49 157 365 24376

SUMMARY

- I have completed Coding Bootcamp and following Full Stack internship
- I have a bachelor's degree in Electronic and Computer Science
- I'm looking for: Intern/Junior role in Web Development area and the opportunity to grow expertise in

SKILLS

- **Frontend Stack:** JavaScript, HTML5, CSS3, React, Redux, Vue, Vuex, Bootstrap
- **Backend Stack:** Node.js, Express
- **Databases:** SQL, PostgreSQL
- **Tools:** Docker, Webpack, Linux, Git
- **Soft Skills:** Project/product management, mentoring, public speaking

EXPERIENCE

- **Elbrus Coding Bootcamp** (Educational Services)
Intern 2022
 - **Learning:** During this full-time 6 months of internship I was learning how to use JavaScript, HTML, CSS, Express, React, Redux and other frameworks on different personal and team projects. Totally I have completed more than 10 projects including website development, web applications and games creation.
 - **Key projects:** As the result of the internship my team and I have completed the final project called We Want Home. It helps users to post adds about lost and homeless animals in order they can find new home or be found by their initial owners.
Github: github.com/MaratKuzakhmetov/We-Want-Home
Stack: JavaScript, Node.js, React, Redux, Material-UI, Express, Yandex UI, Nodemailer, PostgreSQL, Notion
Completed tasks:
 - Integrated functional React components of different complexity.
 - Implemented authorization/authentication (logic part on the front and back), implemented separation of application functionality for users and administrators.
 - Developed the logic of the administrative part of the application.
 - Designed DB architecture.
 - Wrote endpoints.
 - Moved logic from React to Redux (Thunk).
 - Connected Nodemailer to implement a user feedback service.
 - **Other:** Project presentation in front of tutors and other students, mentoring of new students, participation in code review.
- **Compel Electronics** (Electronic components distribution)
Head of Sales 2014 - 2022
 - **Sales and Tech integration:** Within the main work processes (related to sales and customer support) was also engaged in the integration of various web-applications of the company into the Tech departments of customer companies. As part of this interaction, I carried out:
 - Training of customer companies stuff to work with the web application.
 - Collected and analyzed feedback on the results of application exploitation by customer companies.
 - Engaged in independent and team testing of applications within the company.
 - Made changes to both the visual and logical components, coordinated the need for changes with the top management of the company, the internal development department and the development department of the executing company.
 - Controlled the execution of edits (used JIRA).

EDUCATION

- **Elbrus Coding Bootcamp** (Moscow, Russian Federation)
Full Stack JavaScript Developer 2022
- **National Research University Of Electronic Technology MIET** (Moscow, Russian Federation)
Bachelor's degree, Electronic and Computer Science 2007 - 2012
